

## AVISO CLIMATE & WEATHER

Mike Thomas | General Manager Broking

**Aviso Climate & Weather** (powered by Aviso WA Insurance Brokers) is now offering **Parametric Insurance** to the Western Australian Agriculture sector.

**Parametric Insurance** (or also known as Weather Certificates) once the domain of only the large Mining and Construction industries, is available and now protecting Australian Farmers for Temperature and Rainfall covers.

These covers which can be taken at critical times of the Crop Growing Cycle and are used as part of your overall Risk Management process.

Effectively you can arrange Insurance covers:

- Dry Season Cover Too Little Rain
- Frost Protection Too Cold
- Canola Heat Stress Too Hot
- Wet Harvest Too Much Rain

As each of the names suggest, each grower can now take one or more of the above covers in combination or individually, which are specific to their own unique and individual exposures.

With 100 Years of BOM Data now available, the specific covers and premiums generated will differ from grower to grower, even in the similar regions, due to the history of that specific peril and how often it has occurred in the past.

If you wish to discuss further, please contact your local Aviso WA Broker.
